

Grandpa Yukon loves to garden!

He grows lots of vegetables like carrots, lettuce, eggplant and tomatoes. He likes to grow flowers, too. Some of his favorites are sunflowers, roses, snap dragons and bachelor buttons. It takes a lot of work to create a garden and grow things, but it's worth it! In addition to seeds, Grandpa Yukon needs soil, water and sun to help his plants grow. He even needs insects! One of the most important is the bee. Do you know why?

See if you can find out by asking an adult or finding a book in the library. In the meantime, make your own bookmark by coloring the tree and leaves on the left. When you are done, cut it out to use every time you read one of your favorite books.

Have fun!
